Signal Spy

Upgrade

Elyse - 2019-09-12 - Comments (0) - App Overview

If you are a free user, you can upgrade to Pro for $2. This adds not only the extra history features we mentioned before, but it also removes ads, enables root and rootless copy-free dialer codes, provides access to the Preferred Network feature, allows you to change the app's theme, and more features as our app grows. You can also donate beyond $2 if you are so inclined and become a Backer! We appreciate it!

Signal Spy Pro

UPGRADE TO PRO

Only $2, one time only)

Why upgrade?

😊 No ads

⠿ One tap switch with automatic dialer codes

- Project Fi users can easily switch between cellular networks with root supported direct switching
- Non-root supported switching - requires Accessibility support

☁ Set yourself data limits

- Monitor data usage with daily data limits you set for yourself that warn you when you use too much
- Limit data usage when you cross a user-defined threshold

⟲ Detailed history of your connections and signal strength

- Easy to understand History Cards with additional information of network connection history
- Detailed view for each History Card with additional data

📊 Advanced data usage
