Signal Spy

Who develops Signal Spy?

Elyse - 2019-04-15 - Comments (0) - The Basics

Bryan Gintz is the founder of Signal Spy (originally called Fi Spy). A few months in, Ziggy Dziegman joined the project. Yara Abdallah joined the project about a year later. These three have worked on the project ever since. Bryan and Ziggy actively participate in the Google+ communities, support inquiries, and on Reddit.
