Signal Spy

Why is the connectivity blank?

Elyse - 2019-04-15 - Comments (0) - Support, Troubleshooting, & Privacy

Signal Spy requires certain permissions to run. These include location and phone. If you do not provide both of these permissions, we cannot access the required information to show you how your device is connecting to the network. We do not sell your personal location to anyone, nor do we transmit your history data or export it without your permission.
