## Will Signal Spy allow me to prioritize one network over another?

Elyse - 2019-07-03 - 0 Comments - in [FAQ](#)

There are limitations within Google Fi that prevent Signal Spy from doing this. (For instance, two hours after manually switching the network, Google Fi will revert back to automatically choosing to which network you are connected.) However, watch for the release of Signal Spy 2.0 (coming summer 2019!) and a feature that will be added to approximate the ability to prioritize one network over another.
