1.0.16

2015-08-23 - Elyse - Comments (0) - Releases

- Added Fix for majority of unknown networks, they should now show up correctly
- Added an "Email network bug report" that you can use to email support when the network is not showing up like you think it should
- [Experimental] Added Notification shortcut for Dialer Codes. This seems a bit convoluted, but due to limitations in Android, is the best place to start for now. We will keep investigating making it easier. Please provide feedback!
