Signal Spy

1.1.2

2015-12-22 - Elyse - Comments (0) - Releases

- Misc bug fixes
- Better recognition of LTE bands. Thanks for the feedback you've given us thus far!
- LTE bands visible without Wi-Fi being connected (because I'm an idiot and forgot to do that haha)
- The app is more forgiving if you don't have permissions we need. If we don't have them we shouldn't crash for most things. We didn't have time to fix all of them, but it's much improved than it was before.
