Version 1.6

2016-05-22 - Elyse - Comments (0) - Releases

- New Pro Feature - Automated switching for both non-root and rooted users!!!
- Use date format from device (i.e. 12 hour or 24 hour format)
- Updated/Improved Dialer Code launcher (no longer requires the app to open every time)
- New and Improved Settings page
- Links to Getting Started guide and FAQ
- Misc bug fixes and enhancements
- Added settings for Widget Background and Font color
- Added ability to exit app by pressing back from home screen (Due to recommended operation by Android, some processes may wait to be cleaned up by the operating system, this should not affect your usage at all.)
